PART II-B (ii)

GENERAL ECONOMIC TABLES

PREFACE

In this part, a companion to Part II-B(i), are presented the rest of the General Economic Tables (B-V to B-IX) which on account of their bulk could not be accommodated in Part II-B (i). The tables give the occupational classification of persons in non-agricultural sectors (by broad age groups and educational levels for such literates in urban areas), a cross tabulation of data relating to persons having their principal and secondary work in two important sectors of economy viz., household industry and agriculture either as cultivator or an agricultural labourer, classification of unemployed persons by sex and educational levels (also by broad age groups for urban areas), and the type of activity in which the persons not at work are engaged.

The tables will be found useful in finding the educational standard of the working force in urban areas, the important occupations which attract well qualified persons to the urban areas, the extent to which cultivation is supplemented by household industry and *vice-versa*, the educated unemployed and the type of activity in which the persons classified by the Census as non-workers are engaged.

I am grateful to Shri Asok Mitra, Registrar General, India, his Deputy Shri D. Natarajan and the Central Tabulation officer Shri K. D. Ballal for their guidance. I thank Dr. U. B. Mathur Deputy Superintendent Census Operations, Rajasthan who has assisted me in this work.

TABLE B-V

***OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS
AT WORK OTHER THAN CULTIVATION***

TABLE B-V

**OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS
AT WORK OTHER THAN CULTIVATION**

The Censuses in the past had been collecting information regarding occupational particulars of population. The term 'Occupation' then indicated the means of subsistence or livelihood or the supporting sector economy. The Census 1961 gave a precise connotation to the term meaning as the function or the exact work performed by a person in any branch of economic activity. In view of this clear distinction made between industry and occupation, it is not possible to compare strictly the occupational data collected for 1961 Census to those relating to past Censuses.

The table shows the occupational classification of persons at work other than cultivation for the state and the districts separately for total and urban population. The data has been presented separately for each division, group and family of the National Classification of Occupation which is reproduced as Annexure I to the table. Some suitable modifications have, however, been made in the framework of the National Classification of Occupations as detailed below:—

The Occupational families 400-Cultivators (Owners), 401-Cultivators (Tenants) and 414-Agricultural labourers are excluded from Table B-V. Similarly Occupational group X0-Workers without occupations and its families X00-Workers without occupations; Matriculates and above, X08-Workers without occupations; Literates and X09- Workers without occupations; Others, are also excluded from this table. The Occupational family 0X4-Geographers is deleted and family 073-has been assigned to 'Geographers'. The Occupational family 673-Teleprinter Operators is newly added in the National Classification of Occupations.

In a few cases obvious discrepancies between the occupational classification and Industrial Categories have been detected while applying quality check to the various occupations considered in relation to the corresponding industrial categories. Such cases are listed in Annexure II indicating the appropriate industrial category in which the incompatible entries deserve to be classified.

Families having less than 1% of workers of the respective divisions (less than 0.5% in case of families of Division 7-8) have not been shown in the table but are given in the Appendix at the end of the table. Divisions thus affected are marked with an asterisk (*). Lines with nil entries have been omitted.

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

The occupational divisions of only literate persons at work other than cultivation in urban areas have been detailed for their broad age groups and according to the educational levels in this table.

Also shown in the table is the number of total persons at work other than cultivation which figure is inclusive of illiterate workers for each occupational division. This has been provided to give an idea of the extent of literate workers in the context of total workers in each occupational division.

All the occupational divisions are spelt out below in terms of their description in order to facilitate the reading of the table.

Division Code	Description
0	Professional, Technical and Related Workers
1	Administrative, Executive and Managerial Workers
2	Clerical and Related Workers
3	Sales Workers
4	Farmers, Fishermen, Hunters, Loggers and Related Workers
5	Miners, Quarrymen and Related Workers
6	Workers in Transport and Communication Occupations
7-8	Craftsmen, Production Process Workers, and Labourers not elsewhere Classified
9	Service, Sport and Recreation Workers
X	Workers not Classifiable by Occupation

TABLE B-VII

PART-A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AGRICULTURAL LABOURER

PART-B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

Part A of this table is prepared for the persons whose principal work is returned as cultivation, agricultural labour or working at household industry and whose secondary work is any one of the remaining two categories. The figures are given for total/rural/urban.

In case of persons engaged in more than one productive activity, the one which occupied most of his time was considered as his principal work. It was distinguished by a ring round one of the four economic questions, viz., 8, 9, 10 or 11 of the individual slip, relating to cultivation, agricultural labour, household industry or non-household industry respectively, which occupied most of his time. The secondary work was that activity which occupied most of his time next to his principal work. Whenever a person followed only two types of activities, the activity other than principal work was treated as secondary. However, in case of persons having more than two activities, the secondary work was distinguished by a tick on the right hand side of the question number.

This table attempts a cross-tabulation between the principal work and subsidiary work of persons working in cultivation and at household industry or *vice versa*. In other words it shows the extent to which cultivation is supplemented by household industry or *vice versa*.

In the stub, the principal work, viz, cultivator, agricultural labourer or household industry is shown with division and major group as against secondary work in the columns.

Major groups of household industry where persons having secondary work as cultivation or agricultural labour are less than 5 per cent of persons having the major group as principal work, have not been shown in the table but are given in the appendix to this table. Divisions thus affected are marked with an asterisk(*).

In Part B the principal work, viz., industrial classification of the non-household industry is given by divisions and major groups and the additional work, viz., household industry is also given by divisions and major groups. The figures are given for total/rural/urban. This part is prepared by cross-tabulation of persons whose principal work is non-household industry, profession, trade, business or service and who also work at household industry. In such cases Q 11 of the individual slip was marked with a ring and an entry was also made in Q. 10 regarding household industry. The additional work in this table is confined to household industry only.

The relevant extract from the Indian Standard Industrial Classification is reproduced below to enable the reader to ascertain the descriptions of divisions and major groups occurring in the table.

TABLE B-VIII

PART-A—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

PART-B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS IN *RURAL AREAS ONLY*

This is a new table prepared for the first time in 1961. It throws light on educated unemployment in different age-groups. This will be useful for purposes of planning for employment and also assessing the available *man-power*.

The table is presented in two parts. Part-A of the table relates to urban areas only. It gives classification of unemployed persons by their educational levels and age-groups. Unemployed persons have been divided into two categories, viz., (i) those who are seeking employment for the first time and (ii) those who were employed before but now out of employment and seeking work. The age-groups given in the category (i) are quinquennial viz., 15-19, 20-24, 25-29, 30-34, 35+ and those given in category (ii) are 15-19, 20-24, 25-34, 35-44, 45-59 and 60+. The age-groups are further cross-tabulated with different educational levels of educated unemployed.

Part-B of the table gives data for rural areas only. The educational levels in this part are, however, limited to Primary or Junior Basic and Matriculation and above.

TABLE B-IX

PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This table provides information about non-working population divided into 8 categories according to their activities and pertaining to broad age-groups. This table throws a wealth of information which was not previously available for purposes of assessment of man-power resources in connection with planning. This information is presented separately for total, rural and urban. The eightfold classification of the activities of non-workers compiled from the information available in question No. 12 of the Individual Slips of 1961 Census, is based on the recommendations of the United Nations Organisation.

These eight types of activities of non-workers are described below :—

FULL TIME STUDENTS:—This category includes full time students or children attending school who do no other work such as make articles at home for sale nor even help part time in their own family cultivation, industry, trade or business.

HOUSEHOLD DUTIES :—A person engaged in unpaid home duties (like housewife or other adult female) and who does no other work, such as make articles at home for sale or wages, nor help regularly even part time in family cultivation, industry, trade or business is recorded under this class.

DEPENDENTS, INFANTS AND DISABLED:—All dependents, including infants or children not attending school or persons permanently disabled from work because of illness or old age are shown in this category.

RETIRED, RENTIER OR INDEPENDENT MEANS:—Retired persons who are not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work, are classified in this category.

BEGGARS, VAGRANTS, ETC. :—Beggars, vagrants or independent women without indication of source of income and other unspecified source of existence are included in this class.

INMATES OF PENAL, MENTAL & CHARITABLE INSTITUTIONS :—

Convicts in Jail (an under trial prisoner is shown as a worker if he used to work before he was apprehended) or inmates of penal, mental or charitable institutions are classified in this category.

PERSONS SEEKING EMPLOYMENT FOR THE FIRST TIME :—

Persons who were not employed before but are seeking employment for the first time are included in this class.

PERSONS EMPLOYED BEFORE BUT NOW OUT OF EMPLOYMENT AND SEEKING WORK :—

Persons employed before but now out of employment and seeking employment are included in this class.

This type of tabulation was never attempted in earlier Censuses nor were specific questions asked on the activities of all types of non-workers. Data are available in this table for those who have an earning without working. Separate figures are also available in respect of house-workers who are not classified as economically active although they are engaged in domestic work. Data relating to school attending children

will be very useful to the educational authorities. There is a residuary category which consists of all other dependents including children and disabled person. Age classification of this group studied with reference to age tables throws light on the school going children who do not attend school and persons in working age groups who are not working.

A few cases of seemingly un-usual figures appearing in certain age groups of this table are explained below:—

Full time students in age groups 35-59 number 694 males and 608 females and in age groups 60-513 males and 374 females. The full time students in the later group might be persons pursuing advanced Vedic or Sanskrit studies where as those in the former group might be either (i) persons attending literacy classes or (ii) persons pursuing studies in religion, Mythology, music or fine arts or studying in certain training centres. It is not un-common for Government or other employees aged 35 or above to prosecute higher studies or technical training on study leave. Another point worthy of note relates to 29,011 males returned as doing household duties. Though generally it is the women folk who attend to household duties, men folk can not be entirely ruled out from this category or work. A majority of them are in the age group 0-14 and probably represent children who do not attend school but who do assist their parents in household duties.

Further quality check in this respect has revealed two types of cases viz: (i) where the student population is more than the literate population in the age group 5-14 and (ii) where student population is lower than the literate population in the age group 5-14. The following are the districts in which the figures of 1st or 2nd type are predominant.

1st type— Jodhpur (Males-Rural), Pali (Males, Rural & Urban), Jalor (Rural), Sirohi (Males-Rural), Dungarpur (Males-Rural).

2nd type— Bikaner (Females-Rural), Churu (Females Rural & Urban), Jhunjhunu (Females-Rural & Urban), Alwar (Females-Rural), Bharatpur (Females-Rural), Sikar (Females-Rural), Ajmer (Females-Rural), Nagaur (Females-Rural), Barmer (Females-Urban), Jalor (Females-Urban), Sirohi (Females-Rural), Bhilwara (Females-Rural).

The first type may be found in case where the students presumably include persons who are students of Primary or Nursery or Kindergarten classes but who have not been treated as literate.

In the second case, the number of female literates may be more than the female students on account of the fact that girls are usually withdrawn from the schools early mostly after they have attained a certain level of literacy.
